

question,option1,option2,option3,option4,answer,topic,level,type

"Drag the H^+ ion to the cathode"," H^+ "," Cl^- "," Na^+ "," OH^- "," H^+ ","Lab 1: Ion Movement",1,lab

"Drag Cl^- ion to the anode"," H^+ "," Cl^- "," Na^+ "," OH^- "," Cl^- ","Lab 2: Ion Movement",1,lab

"Complete the circuit in Lab 3 by selecting the right

electrode","Anode","Cathode","Neutral","None","Cathode","Lab 3: Circuit Setup",1,lab

"Identify the electrode where reduction

occurs","Anode","Cathode","Neutral","Either","Cathode","Lab 4: Electrolysis Concept",1,lab

"Select the ion that migrates to the anode"," H^+ "," Cl^- "," Na^+ "," OH^- "," Cl^- ","Lab 5: Ion

Migration",1,lab

"Which ion is attracted to the cathode?"," H^+ "," OH^- "," Cl^- "," Na^+ "," H^+ ","Electrolysis Basics",2,yaq

"Electrolysis of dilute NaCl produces?"," H_2 & Cl_2 "," O_2 & H_2 ","Na & Cl"," H_2 & O_2 "," H_2 & Cl_2 ","Electrolysis Products",2,yaq

"Which electrode is positive in

electrolysis?","Anode","Cathode","Neutral","None","Anode","Electrode Polarity",2,yaq

"What gas is released at the anode during electrolysis of

water?"," O_2 "," H_2 "," Cl_2 "," N_2 "," O_2 ","Electrolysis Products",2,yaq

"Which of the following is a cation?"," Cl^- "," SO_4^{2-} "," Na^+ "," NO_3^- "," Na^+ ","Ion Types",2,yaq

"What happens to OH^- ions in electrolysis of water?","Move to cathode","Move to anode","Stay in solution","Neutralize","Move to anode","Ion Movement",2,yaq

"Electrolysis of molten NaCl gives?","Na & Cl_2 ","NaCl","Na & Cl","Na & Cl_2 ","Na & Cl_2 ","Electrolysis Products",2,yaq

"Which electrolyte is used for electrolysis of water?","Dilute H_2SO_4 ","NaCl solution","Molten NaCl","HCl","Dilute H_2SO_4 ","Electrolyte Choice",2,yaq

"During electrolysis, where does oxidation

occur?","Anode","Cathode","Neutral","Either","Anode","Electrolysis Concept",2,yaq

"Which electrode is the site of

reduction?","Anode","Cathode","Neutral","None","Cathode","Electrode Concept",2,yaq

"What is the product at cathode during electrolysis of $CuSO_4$ with Cu

electrodes?","Cu"," Cu^{2+} "," SO_4^{2-} "," O_2 ","Cu","Electrolysis Products",2,yaq

"What happens if current is reversed in electrolysis?","Electrode reactions swap","No

reaction","Solution decomposes","Electrolyte changes","Electrode reactions swap","Advanced Electrolysis",3,yaq

"Predict the products if molten $PbBr_2$ is electrolyzed","Pb & Br_2 ","Pb & Br"," Pb_2 & Br_2 ","Pb & Br_2 ","Pb & Br_2 ","Electrolysis Advanced",3,yaq

"Explain why H^+ ions move to cathode","Cations are positive","Cations are negative","Anions move faster","Electrons attract them","Cations are positive","Ion Movement Reasoning",3,yaq

"What is the effect of increasing current on electrolysis rate?","Increases rate","Decreases rate","No effect","Stops reaction","Increases rate","Electrolysis Concept",3,yaq

"During electrolysis of brine, what forms at cathode?"," H_2 "," Cl_2 ","Na","NaOH"," H_2 ","Electrolysis Products",3,yaq

"Explain why oxygen is released at the anode during electrolysis of water","Anions are

oxidized","Cations are reduced","Electrons move to cathode","Water decomposes","Anions are oxidized","Advanced Electrolysis",3,yaq

"Identify the product of electrolysis of molten Al_2O_3 at cathode", "Aluminium", "Oxygen", " Al^{2+} ", " Al^{3+} ", "Aluminium", "Electrolysis Products", 2, yaq

"Identify the product at anode during electrolysis of molten Al_2O_3 ", "Aluminium", "Oxygen", " Al^{2+} ", " Al^{3+} ", "Oxygen", "Electrolysis Products", 2, yaq

"Predict the product at anode during electrolysis of CuCl_2 ", " Cl_2 ", "Cu", " H_2 ", " Cu^{2+} ", " Cl_2 ", "Electrolysis Products", 3, yaq

"Predict the product at cathode during electrolysis of CuCl_2 ", "Cu", " Cl_2 ", " H_2 ", " Cu^{2+} ", "Cu", "Electrolysis Products", 3, yaq

"Which statement about electroplating is correct?", "Metal deposited at cathode", "Metal deposited at anode", "Electrolyte is metal", "All ions neutralized", "Metal deposited at cathode", "Applications", 2, yaq

"What happens if concentrated NaCl solution is electrolyzed?", " Cl_2 at anode, H_2 at cathode", " O_2 at anode", "Na at cathode", "No reaction", " Cl_2 at anode, H_2 at cathode", "Electrolysis Products", 3, yaq

"Why is dilute H_2SO_4 used in electrolysis of water?", "Increases conductivity", "Decreases conductivity", "Neutral", "Acts as catalyst", "Increases conductivity", "Electrolyte Choice", 2, yaq

"Predict what happens if NaCl(aq) is electrolyzed with graphite electrodes", " Cl_2 at anode, H_2 at cathode", "Na at cathode", " O_2 at anode", "No reaction", " Cl_2 at anode, H_2 at cathode", "Electrolysis Products", 3, yaq

"Explain why molten salts are used for extracting metals", "Ions free to move", "Solid metals react", "Water decomposes", "Electrodes neutral", "Ions free to move", "Advanced Electrolysis", 3, yaq

"Identify the ions in NaCl solution", " Na^+ & Cl^- ", " H^+ & OH^- ", " Na^{2+} & Cl^- ", " Na^+ & OH^- ", " Na^+ & Cl^- ", "Electrolysis Basics", 2, yaq

"Explain why anions move to anode", "Attracted to positive electrode", "Attracted to negative electrode", "Neutral", "Depends on size", "Attracted to positive electrode", "Ion Movement Reasoning", 3, yaq

"Which gas is liberated at anode during electrolysis of molten NaCl?", " Cl_2 ", " O_2 ", " H_2 ", "Na", " Cl_2 ", "Electrolysis Products", 2, yaq

"Which gas is liberated at cathode during electrolysis of water?", " H_2 ", " O_2 ", " Cl_2 ", "Na", " H_2 ", "Electrolysis Products", 2, yaq

"Which is oxidized during electrolysis of CuCl_2 ?", " Cl^- ", " Cu^{2+} ", " H^+ ", " OH^- ", " Cl^- ", "Electrolysis Advanced", 3, yaq

"Which is reduced during electrolysis of CuCl_2 ?", " Cu^{2+} ", " Cl^- ", " H^+ ", " OH^- ", " Cu^{2+} ", "Electrolysis Advanced", 3, yaq

"Predict the products if MgBr_2 is electrolyzed", "Mg & Br_2 ", "Mg & Br", " Mg_2 & Br_2 ", "Mg & Br_2 ", "Mg & Br_2 ", "Electrolysis Advanced", 3, yaq

"Explain why hydrogen is liberated at cathode during electrolysis of water", "Cations gain electrons", "Anions gain electrons", "Neutral ions", "Depends on electrode", "Cations gain electrons", "Ion Movement Reasoning", 3, yaq

"Explain why oxygen is liberated at anode during electrolysis of water", "Anions lose electrons", "Cations lose electrons", "Depends on electrolyte", "Neutral ions", "Anions lose electrons", "Advanced Electrolysis", 3, yaq

"Which of the following is an example of electroplating?", "Silver plating spoon", "Boiling water", "Electrolysis of water", "Rusting iron", "Silver plating spoon", "Applications", 2, yaq

"Explain why ionic compounds must be molten or in solution for electrolysis", "Ions free to move", "Solid conducts", "Metal decomposes", "Electrode neutral", "Ions free to move", "Electrolyte Choice", 3, yaq

"Predict products if $\text{CuSO}_4(\text{aq})$ is electrolyzed using inert electrodes", "Cu at cathode, O_2 at anode", " H_2 at anode", " Cu^{2+} at cathode", "No reaction", "Cu at cathode, O_2 at anode", "Electrolysis Advanced", 3, yaq

"Why is graphite used as electrode in some electrolysis experiments?", "Conducts electricity", "Neutral", "Reacts", "Non-conductive", "Conducts electricity", "Electrode Choice", 2, yaq

"Explain why Cu^{2+} ions are attracted to cathode", "Cations attracted to negative electrode", "Cations attracted to positive electrode", "Anions move to cathode", "Depends on concentration", "Cations attracted to negative electrode", "Ion Movement Reasoning", 3, yaq
